Fawaz Sobowale

AI/ML Engineer | Applied AI and Python Backend

fawazsobowale.dev@gmail.com | GitHub | Portfolio | Open to remote roles

Summary

AI/ML engineer building document intelligence, machine learning APIs, and AI workflow automation. Works across model integration, backend services, databases, testing, and deployment, with commercial experience in AI-focused startups.

Technical Skills

Applied AI: RAG, hybrid retrieval, reranking, citation validation, structured LLM outputs

Machine learning: Python, pandas, NumPy, scikit-learn, feature preparation, model evaluation, inference APIs

Backend and delivery: FastAPI, Node.js, PostgreSQL, Redis, Docker, GitHub Actions, pytest, Ruff, mypy

Foundations: Statistics, deep learning, natural language processing, computer vision

Selected Engineering Projects

LoreForge

Python, FastAPI, PostgreSQL, React, RAG | Source | Live app

- Built a deployed document intelligence application for querying private PDFs and tracing answers to source citations.
- Implemented hybrid semantic and BM25 retrieval, reranking, citation validation, owner-scoped queries, automated tests, Docker, and CI.

Fraud Detection API

Python, scikit-learn, FastAPI, Docker | Source

- Served a trained logistic regression pipeline through FastAPI, turning transaction features into a probability and classification.
- Implemented startup model loading, validated inputs and probabilities, a configurable decision threshold, automated tests, and Docker packaging.

SentinelStream

Python, FastAPI, PostgreSQL, Streamlit | Source

- Built an asynchronous log-processing system with deterministic anomaly detection and a Streamlit interface for reviewing logs and incidents.
- Implemented transactional persistence, stable incident identities, keyset-paginated APIs, retry handling, and structured observability.

Professional Experience

Paal AI | Client Success Manager, promoted to Sales Manager

May 2024 - September 2025 | Full-time

- Contributed approximately $270,000 in revenue through sales, client relationships, partnerships, and strategic outreach.
- Generated 500 qualified leads and managed a sales outreach team focused on lead generation and conversion.

Gambit Markets | Marketing

November 2025 - April 2026

- Created content and supported community engagement for an AI-powered prediction markets platform.

Education and Training

Caleb University | B.Sc. Computer Science

2022 - 2026 | Final results pending

APTECH | Smart Professional AI

Artificial Intelligence and Machine Learning | 2025 - 2026 | Certificate collection pending
